Full-day, in home validation of infant body position measurements from inertial sensors

## **Current**

## **Methods**

**Participants**

**Apparatus**

**Procedure**

**Body position annotation**

**Body position classification**

**Goal 1: Optimize and validate body position classification model**

**Goal 2: Assess classification accuracy across a long delay**

**Goal 3: Examine wear time and compliance in full-day data collection**

**Goal 4: Compare classification estimates to prior literature**

## **Discussion**

## References
